Lyon, 7th November 2017

Dear Doctor Martinez

I hereby send you this letter, after arriving back to Lyon in France where I live.

Recently I came to see you at your Rockville Pike Clinic for a pre-surgery examination and the following day to undergo a removal of a Pterygium, all performed by you.

Last year, now 18 month ago, I discovered a change on my left eye. I went to see a Specialist here in Lyon. He examined my eye and informed me, that I had developed a Pterygium. I was told to leave it for the moment and only come back if I felt concerned about it growing further. I went to see the Specialist again and was told, that he could remove this in his Surgery but the reoccurrence rate would be as high as 90%.

I therefore decided, seeing as I grew up in a family surrounded by Medical Doctors, to investigate further into Surgical procedures elsewhere in Europe and abroad. It soon became apparent to me, that the number of Pterygium cases in Europe are infrequent, so the surgical procedure is less of a lasting technique.

I looked at Specialists in the USA and came upon your reference Doctor MARTINEZ.

My further research brought me to the conclusion, that you seem to have not only the qualification as an experienced Ophthalmologist but in particular with Pterygium Graft removal. There was therefore no doubt in my mind, than to contact you at your Rockville Clinique.

From my very first telephone contact I made to your Secretary and Dr Jenny HA, I was convinced that this was a most professional Medical Clinique. Your Staff has been extraordinary every time I have telephoned, emailed and lastly as I came to see you at the premises. All Staff seem to pay a lot of attention to every patient including myself.

As I had my first appointment with you Dr MARTINEZ, I was again reassured that your experience and qualification are extraordinary. Your approach to explain the procedure in details and your general presence really made me feel less anxious. Your surgical performance and human support all along made the whole procedure and follow up less of a worry.

I certainly felt rather lucky to be in the care of you and all your Staff.

I hereby send you and all your Staff at the Rockville Clinique a profound thank you for everything you have possibly done for me. I honestly feel, that I could not have been in more qualified and caring hands.

Thank you and do keep up your amazing level of care and surgical excellence.

Very warm regards
Camilla WIINBLAD
